

MARINE / NAVY / OIL & GAS PRODUCTS

STANDARDS

ANSI, API, ASME, ASTM,
MSS, NACE, Norsok,
PED, EEMUA, Achilles, and
all Military Specifications

MATERIALS

Copper Nickel Alloys - 90/10, 70/30
UNS C70600, C70620, C7060X, C71500, C71520, C71640

Duplex/Super Duplex
UNS S31803, S32205, S32750, S32760

6 Moly
UNS S31254, N08925, & N08926

Titanium
Grades 1, 2, 5, 7, 9, & 12

Bronze
*AlBr, RG5, RG10, other Gun Metal qualities,
and zinc free bronze (CuSn10)*

FORMS

Seamless & Welded Pipe
Seamless & Welded Tube
Valves
Flanges
Seamless & Welded Butt Weld
Fittings
Specialty Forgings
Actuators

MEET PM

PM International Suppliers delivers pipe and fittings, tubing, valves, flanges, and other forms in exotic materials such as Duplex, Super Duplex, 6% Molybdenum, Titanium, Copper Nickel, and Nickel alloys.

We deliver to the offshore petrochemical segment, geothermal, chemical manufacturing, desalination, power plants, water treatment facilities, and more. Our customers are worldwide, and we handle everything from one-off emergency deliveries to complex, long-ranging project installations. We have partnered with the Sander Meson group to deliver to the navy and marine industry.

EXPERTISE

With 30 years in the industry, our technical expertise and extensive success with difficult project specifications sets us a cut above the rest. This technical expertise assures our customers that their critical projects are in the hands of the best in the industry.

While there are many suppliers in the industry, what sets PM apart is the manner in which it shares its expertise, not only with customers but also manufacturers. We see ourselves as a connector between production and utilization, with the philosophy that shared knowledge is shared success for all parties involved.

LOGISTICS

Identifying partners in logistics is all about leverage, real or predicted. We understand the importance of matching demand with supply and always seek alliance with solid manufacturers and top ranked freight agencies, applying logistics technology to all aspects of our delivery system.

Logistical activities are not allocated to one department in the company; all primary functions in the company - Sales, Procurement, Warehousing, and Delivery - come together with a team approach that constantly monitors the pulse of our order fulfillment activities.

PROJECT MANAGEMENT

From initial product assessment to after-sales support, we align our people and priorities for complete and swift process-focused actions. Reliably monitoring to all aspects of a project for successful and timely completion, our goal is always to be flexible and responsive to the unforeseen that, unless anticipated and mitigated, can throw off the best of planning.

We are experts in dealing with multiple locations, manufacturers, shippers, and complex delivery schedules. We like to think locally and operate globally, seamlessly, and efficiently.
